

## HSSG-A

### HSS Rotary Burrs Cylindrical A-Shape for Soft Steel

#### PRODUCT DETAILS

- High-speed steel burrs are used primarily for machining soft steel, aluminium, bronze, brass, etc.
- Type of cut; M: medium, for machining unhardened steel and other moderately hard materials under normal conditions
- EC: extra coarse, for soft materials when good stock removal is required, counteracts chip build-up between teeth
- Cylindrical shape
- Burrs are the better choice when optimal machining conditions cannot be maintained or when risk of vibration and impact shock are high
- Also usable with low cutting speeds
- Packaging: plastic box - individually packed in boxes of 5
